Coronavirus Disease 2019 (COVID-19)

The Cal OES State Operations Center (SOC) activated 03/02/20 at 0700 hours in support of the California Department of Public Health (CDPH) Medical Health Coordination Center's (MHCC) statewide response to COVID-19. Cal OES will continue to provide resource coordination for the COVID-19 event, as well as situation status reporting and advance planning across multiple areas.

Situation Overview

- **California State of Emergency Proclamation**

On 03/04/20, Governor Gavin Newsom declared a State of Emergency for California, as a result of the global COVID-19 outbreak that began in December 2019, to make additional resources available, formalize emergency actions already underway across multiple state agencies and departments, and help the state prepare for broader spread of COVID-19.

- **Global Health Advisory**

On 08/06/20, in close coordination with the U.S. Centers for Disease Control and Prevention (CDC), the Department of State lifted the Global Level 4 Health Advisory. The Global Advisory, initially put in place on 03/19/20, advised U.S. citizens to avoid all international travel due to the global impact of COVID-19. For more information visit: <https://www.state.gov/>.

- **State Executive Order N-33-20**

On 08/28/20, California introduced a blueprint for reducing COVID-19 in the state with revised criteria for loosening and tightening restrictions on activities by counties. Visit [Blueprint for a Safer Economy](#) for more information and to check the status of a county. This blueprint included a health equity metric to be used along with other metrics to determine a county's tier. The purpose of [Equity Metric](#) is to ensure California reopens its economy safely by reducing disease transmission in all communities.

WEATHER KEY POINTS

01/11/21 - 01/17/21

Monday-Sunday

- Locally gusty winds and low humidity in southern California, especially in the mountains from Santa Barbara to Los Angeles County, will lead to elevated to briefly critical fire weather concerns through Monday
- In far northern California, gusty winds up to 55 mph could cause minor damage late Monday night and Tuesday, especially along the northwest coastline and over exposed mountain ridge tops
- Large breaking waves and high astronomical tides could lead to coastal flooding through Monday morning
 - Up to a foot of saltwater inundation is possible above sea level
 - Minor flooding of sea water is likely, a few hours before and after high tides, over vulnerable low-lying coastal areas such as parking lots, beaches, and walkways. Significant damage to roads or structures is NOT expected.
- Heavy rain and high mountain snow are possible Monday night through early Thursday.
 - Widespread flooding is not expected. However, smaller streams may approach bankfull, and standing water is possible in poor drainage areas.
 - Localized flooding near the coast may be exacerbated by high astronomical tides and periods of high surf.
 - Mainstem rivers are forecast to remain below flood stage
- Gusty offshore winds will return to Southern California Thursday into next weekend.
